

## ***B.SUITE***

*b.suite*, braille transcription software for text, mathematics and music.

---

*b.suite* is **braille transcription software** designed specifically for blind users. Developed by *Eurobraille*, it benefits from **more than 20 years of experience** in creating transcription software and replaces esysuite.

## **DESCRIPTION**

La suite d'applications *b.suite* allows users to **create documents in different types of braille**: 8-dot braille, 6-dot braille, contracted braille, mathematical braille and music braille. It also makes it possible to **obtain a transcription intended for sighted users**.

## **TRANSCRIPTION FROM BRAILLE TO PRINT AND FROM PRINT TO BRAILLE**

*b.suite* enables the **transcription of mathematics and music from braille to print and vice versa**. It therefore offers **a solution suited to two-way transcription needs**, both for reading and for producing accessible documents.

## **B.SUITE AND MATHEMATICS**

A LibreOffice document in ODT format containing mathematical formulas created with the equation editor can be **converted into braille** in 6-dot braille, 8-dot braille and mathematical braille.

Mathematical formulas are **calculable**. In braille editing, **switching to mathematical mode** is done

simply with dot 6.

## B.SUITE AND MUSIC

*b.suite* **allows musical scores to be imported and exported** in MusicXML format. Scores can also be listened to in MIDI format.

The software also offers **karaoke functions**, and the **speech synthesis** can sing the lyrics.

## FEATURES

### COMPATIBILITY

- b.suite is available for Windows 10 and Windows 11.
- The software is also available for all b.note and b.book devices.

### PLEASE NOTE

- Some functions require a compatible braille embosser.
