ESYSUITE

Designed especially for people with vision loss, **esysuite** allows the blind population to type or translate Braille in different types of documents and to print both in black ink characters and Braille (braille printer needed).

DESCRIPTION DU PRODUIT

Designed especially for people with vision loss, **esysuite** allows the blind population to type or translate Braille in different types of documents and to print both in black ink characters and Braille (braille printer needed).

ESYSUITE, THE IDEAL SOLUTION FOR BRAILLE TRANSCRIPTION

Depending on your needs and habits, the documents may be:

- created with a **b.note** or **esys** Braille display
- simply imported from another application

eurobraille - 31 Cours des Juilliottes, 2ème étage droite - 94700 MAISONS-ALFORT - Tél: +33.1.55.26.91.00 • Fax: +33.1.55.26.91.91 -

eurobraille

esysuite supports following formats :

- Word (.docx)
- LibreOffice(2) (.odt)
- texte brut (.txt) ou formaté (.rtf)
- fichier acrobat (.pdf)
- braille Duxbury (.brl), etc.

In addition, the OCR module allows you to import an image and start characters recognition as well as conversion into text. **esysuite** can also import images from a scanner and run OCR recognition.

Multiple dictionaries (synonyms, encyclopedia, conjugation, foreign languages in for example English and Spanish) supports effective processing of your texts.

esysuite is available in several languages, contact us for more information.

ESYSUITE AND MATHS

- stable translation of braille math into black ink characters, or vice versa
- formulas can be created in LibreOffice (for example) and then inserted directly without any additional changes in **esysuite** for embossing.
- you can also type braille math code directly in **esysuite** and save the file in .odt format.
- Saved files can be used with LibreOffice or exchanged with other fellow students and teachers.
- **esyOCR** (Optical Character Recognition)
- **esymath** (tool supporting math problems and courses)

$$\sqrt{a^2 + b^2}$$

ESYSUITE AND MUSIC

Similar to math, **esysuite** manages international Braille music code and also allows you to translate,

eurobraille

display and print your music in black ink characters, Braille or a combination of both.

COMPATIBILITY AND VERSIONS

- *esysuite* is available for Windows and is compatible with b.note and esys Braille display series.
- *esysuite* is also available in a special version for transcription centers, to be used with virtual Braille keyboards

EXAMPLE : SCREEN CAPTURE
