## ESYTIME EVOLUTION

**esytime evolution** is a new generation Braille device. This is a notetaker, a Braille computer and a Braille display, all-in-one, compact and autonomous.

---

## PRODUCT DESCRIPTION

**esytime evolution** is equipped with a 32-character Braille display, a 10 key Braille keyboard, 2 joysticks, 8 function buttons and a exchangeable battery providing up to 13 hours battery life.

## ESYTIME EVOLUTION : A REAL BRAILLE COMPUTER

Windows 10 provides the stability of **esytime evolution**. The standard screen reader NVDA is included and ready to use. Alternatively, you can install Jaws, Supernova, Cobra... or other compatible Windows software needed and of course connect your peripherals (printers, scanners...). There will be no more software compatibility issues !

You can also browse the Internet or manage your email anywhere using Wifi... No need to carry both a PC

eurobraille

and a Braille notetaker with you: **esytime evolution** is enough!

Using its Braille terminal mode, **esytime evolution** can be connected to your personal or business computer with a standard screen reader for reading, working and navigation.

## ESYSUITE, THE IDEAL ADDITION

**esyuite** is a very powerful software suite located inside *Esytime Evolution*, designed especially for the blind population in the educational environment.

It turns your **esytime evolution** into a notetaker which operates independently from Windows 10.

**esyuite** is easy to keep up to date and can be upgraded with new modules and features to meet the evolving needs of the blind users. It requires no previous computer knowledge and has its own high quality speech synthesis.

**esyuite** consists of several software modules:

- **esynote**: manages different types of Braille in the same document, such as 8-dot computer Braille, Grade 1 and Grade 2 (contracted Braille), mathematics (integrates scientific calculations) Braille code and international Braille music code. It is possible to create a single printable document in Braille or in black ink characters. **esynote** makes the conversion to optimize black ink printing.
- **esyfile**: uses the file manager to organize your files, folders and subfolders.
- **esyschool** : manages your schedule and the tasks in the student assignment booklet.
- **esyOCR** : using this menu option combined with a simple scanner allows you to scan documents and display their content in braille or as audio output. **esyOCR** converts your *Esytime Evolution* to a reading machine.
- **esymath** : a unique tool supporting math problems and courses tasks displaying them in black ink characters and braille or vice versa.

**esytime evolution** also features access to Internet, plus an audio and Daisy player!

## FEATURES

- 32 Braille cells / 32 routing cursor keys
- 10 key Braille keyboard
- 2 joysticks

**eurobraille**

- Intel Atom Quad Core e3845 2.1Ghz
- 4 GB ram
- 120Gb SSD hard disk drive
- Windows 10 Home Premium & Office Starter
- Installed software: NVDA
- 3 USB ports + 1 mini USB
- SD-card reader
- HDMI port
  
- Ethernet port
- Bluetooth 4.0 and WiFi
- Multipoint Bluetooth
- Integrated loudspeakers & microphone
- Audio in / out
- Anti-theft protection (cable lock slot)
- Exchangeable battery (8 hours autonomy)
- Protection case included
- Dimensions: 26 x 18 x 2,5 cm
- Weight: 1,2 kg
